

Roofing: What you may not know!

Roof design and construction are more complex than one would think. Whether the roof is for new construction or a re-roofing project, many important considerations need to be taken into account. Overlooking any of these critical factors can make the roof harder to install and can have a negative effect on the roof's performance and life span. From proper wording of construction documents to making sure that the roof and walls work together seamlessly, this presentation offers an overview of these critical factors.

Learning Objectives:

- Understanding the standards and the implications of referencing them
- Understanding the importance of Air Barriers in roofs
- Understanding typical construction issues with Green Roofs

Presenter: Josh Jensen, ASCT, CHI, RRO, RRC is a Registered Roof Observer (RRO) and RCABC-accepted Inspector, he recently became the second person in BC to obtain status as a Registered Roof Consultant (RRC). His strengths include investigation, systems and integrations design, field review and inspection.

Date: Friday, February 24, 2012

Time: 8:00 am – 8:30 am Registration and Breakfast
8:30 am – 11:00 am Presentation
